

英语母语版问卷

LinguaGraph – Language and Thinking Survey

Background Information

Age: _____

1. Please write down the first five words that come to mind when you see the word: "Time"

2. Please explain the English word "Privacy" in both English and a foreign language that you speak proficiently. Important: Do not simply translate your English explanation word-for-word into the foreign language. Instead, try to explain the concept naturally in each language.

English:

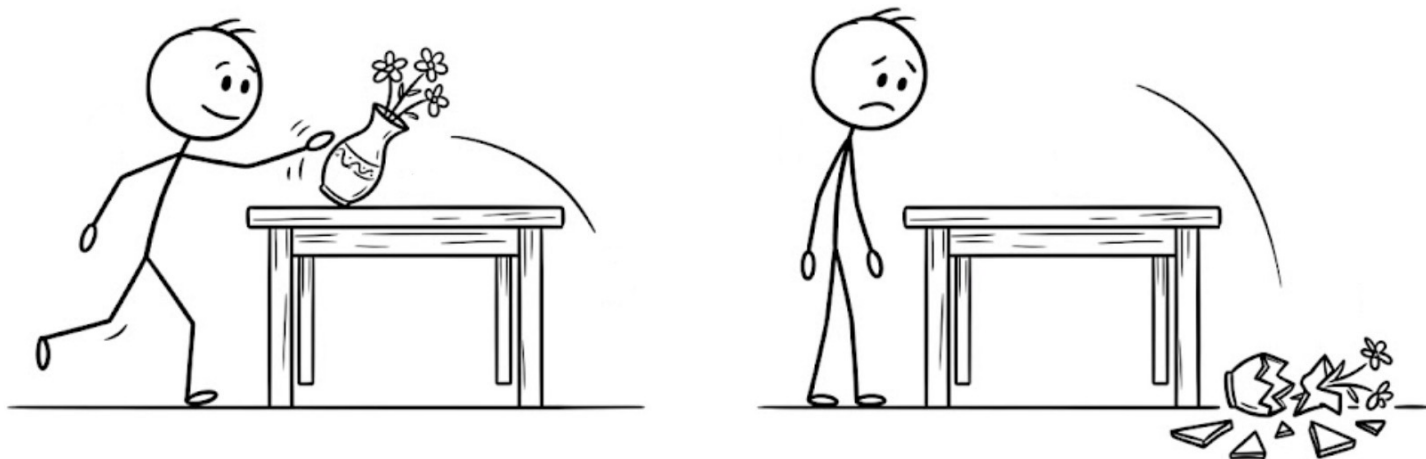

Foreign language:

3. Imagine that you accidentally said something wrong in front of 20 people and everyone laughed. What would be the most natural thing for you to say immediately in your native language?

Please write only one sentence (maximum 15 words).

4. Describe what happened in your native language.

Maximum 20 words.

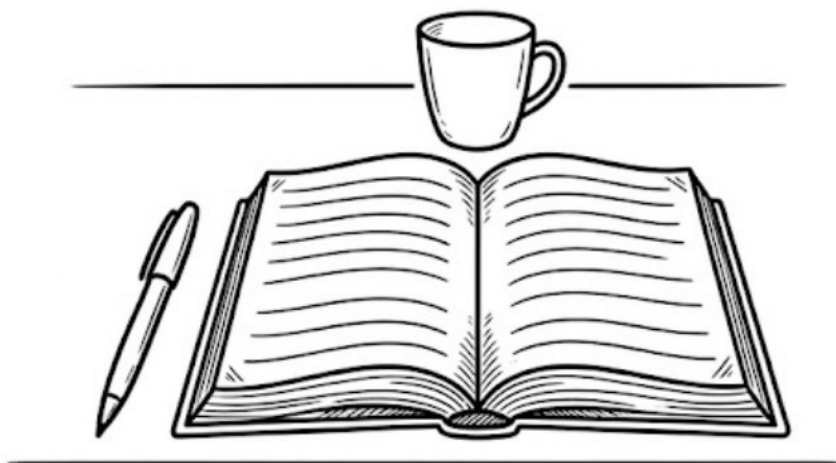

5. Please express the following situation in your native language: Mike came out of the room, walked through the living room, and went into the garden.

Please do not omit any information about direction or location.

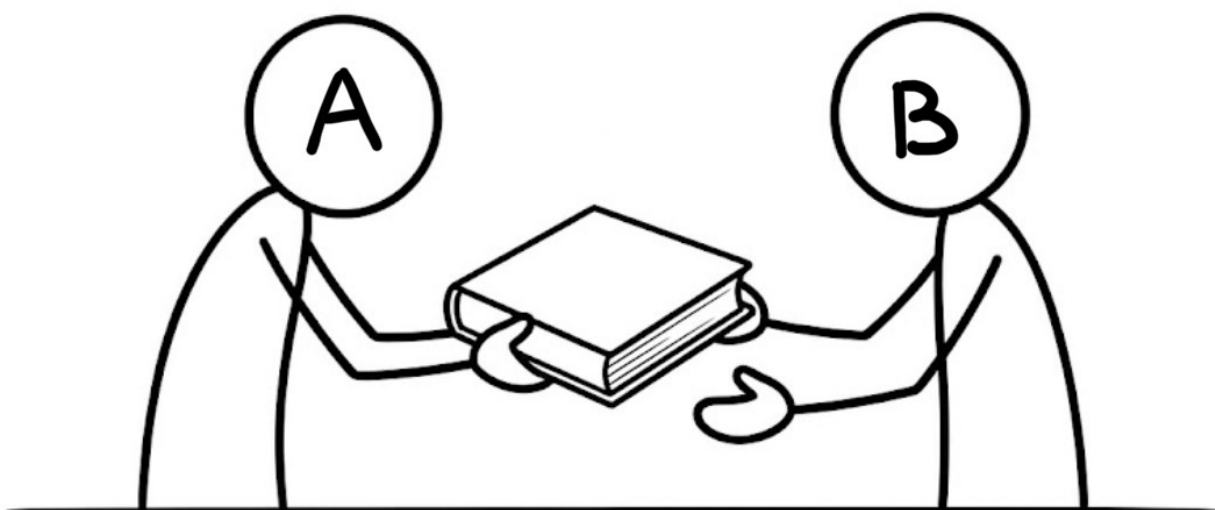

6. Describe the positions of the cup and the pen relative to the book in your native language.

Please do not omit any information about direction or location.

7. Please express the following in your native language: The exam is in six days. The exam has been moved forward by two days.

8. Describe the scene in your native language.

9. Please express the following situation in your native language: "Because it was raining yesterday afternoon, the mother gave an umbrella to the girl."

Please write it naturally in your native language rather than translating word-for-word.

10. Imagine that a large hospital uses a robot that can:

- measure patients' body temperature

- distribute oral medication
- record vital signs
- push wheelchairs
- call the doctor on duty
- make hospital beds
- transport medical waste

Please create an official name for this robot in your native language.

The name should be informative enough that a person who has never seen the robot before could roughly guess what it does.
